

NRCC

NATIONAL RESOURCE CENTER ON
CYBERCRIMES
AGAINST INDIVIDUALS

The National Resource Center on Cybercrimes Against Individuals (NRCC) offers practical, trustworthy guidance for professionals and communities addressing digital abuse against individuals, focusing on cyberstalking, nonconsensual distribution of intimate images (NDII), and technology-facilitated abuse.

Through training, resources, and targeted technical assistance, NRCC helps law enforcement, advocates, prosecutors, judges, educators, and communities grow their capacity to respond to digital abuse. NRCC does not provide victim services.

NRCC trainings are for professionals who seek to increase their understanding of cybercrimes and enhance their skills in working with victims or offenders. We tailor every training to the specific needs of the audience, incorporating local laws and community needs.

CUSTOMIZED TRAININGS

TOPICS INCLUDE

- Digital safety planning with victims
- Recognition, preservation, and collection of electronic evidence
- Identifying suspects through digital footprints
- How to use free forensic tools
- The misuse of AI and emerging technologies in stalking, domestic violence, and sexual assault cases
- Coordinated community response

EXPERT CONSULTATION

Our team of experts is available to assist professionals with active cases and specific issues. From obtaining search warrants to preservation requests to understanding the elements of a local statute, NRCC is here to provide individualized support.
